Pilot Data

We have received 36 responses as of 11/1/2021. We began collecting data on 10/31/2021 and will accept responses up until 11/14/2021. Of these 36 responses, 10 could not be trivially attributed to a subject due to a difference between the email we assigned to treatment and the email we received a response from. We expect that we will be able to match these responses to their treatment group in time.

For now, we present a histogram of responses by treatment group for the matched subjects. Our control group provides no monetary reward for completing the survey. We have two treatment groups. The first offers a guaranteed \$5 Amazon gift card for completing the survey. The second offers entry into a lottery for a \$100 Amazon gift card.

Number of Responses by Treatment Group

N=26
